

Established in 1960, Hague Quality Water is one of the oldest major water treatment manufacturers in the world.

Bill Hague began his entrepreneurial journey in 1960 with just a blank piece of paper and a vision. Fifty years later, his vision has been realized and the blank paper replaced by countless accolades touting his company's contributions to the water treatment industry, numerous awards, and recognition for multiple cutting edge technological patents and product designs.

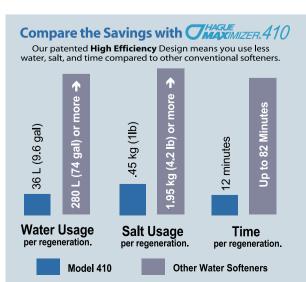

From our computerized solid-state control to our exclusive directional flow screens, only the most advanced manufacturing processes and materials have been used to build the Hague Maximizer 410.

- Built-in, Salt and Water Saving Technology
- ✓ Low Profile Design
- Convenient Easy-Fill Salt Cabinet
- Quality Materials and Components
- Absolute Brining
- Multi-Function Controller Operates By Demand Mode or
- ✓ Time Forced Regeneration
- Patented Capacity Guard Never Run Out Of Softened Water
- Low Maintenance Just Fill With Salt As Necessary

 Our Patented Packed Bed Mineral Tank Eliminates The Need For A Second Tank

In addition to traditional tablet salt, block salt can also be used, and is much easier to handle than those heavy bags of conventional salt.

BLENDING BYPASS VALVE

Our full 1 inch valve features 1 inch porting throughout to maximize the water flow.

SYSTEM CONTROLLER

Operates in three languages and retains cycle settings indefinitely, even through power outages. The time of day setting remains in memory for up to seven days without power.

WHOLE HOUSE, BUILT-IN, SELF CLEANING FILTER

Filters dirt and sediment down to 20 microns - smaller than the human eye can see. Plus, there's never any cartridges to change and no maintenance is required.

SAFETY SHUT-OFF SYSTEM

To help prevent the possibility of any overflows, Hague Maximizer 410 features a safety shutoff - just the kind of detail you would expect from Hague.

FINE MESH RESIN

Our patented mineral tank with its screened distributor system allows us to pack more resin in the tank and backwash our unit with clean soft water, therefore eliminating the need for a second mineral tank.

GRID PLATE

The grid plate in the segregated brine tank compartment provides a clear well area to ensure consistent brine concentration
